**CHAPTER 2, WEATHER**

**76, Navtex 490kHz stations**, yellow text block, substitute:

*UK 490 kHz stations provide forecasts for UK inshore waters, a national 3 day outlook for inshore waters and, at times in bold, reports of actual weather at the places listed below. For these reports select message category 'V' on the receiver. Times (UT) are listed in chronological order. Reports include: Sea level pressure (mb), wind direction and speed (kn), weather, visibility (M), air and sea temperatures (°C), dewpoint temperature (°C) and mean wave height (m).*
