

Selection Tool Water System

What's the best water heating system for my boat?

1. Select the length corresponding to your boat.
2. From there, trace a line to the left until you come to the line corresponding to the waters in which you plan to operate.
3. From there, trace a line vertically downwards until you come to the line corresponding to the season in which you plan to operate.
4. From there, trace a line to the right: Select the line corresponding to your type of boat in the lower section and then trace a line vertically downwards – that's the recommended system.

Our specialists can provide you more information about this topic – for example about the influence of the water temperature in your operating waters on your choice of heating system. Simply contact one of our expert service consultants for individual advice.
